CSS Syntax

position: static|absolute|fixed|relative|sticky|initial|inherit;

Value	Description
static	Default value. Elements render in order, as they appear in the document flow
absolute	to its first positioned (not static) ancestor element
fixed	to the browser window
relative	to its normal position
sticky	The element is positioned based on the user's scroll position
initial	Sets this property to its default value "static"
inherit	Inherits this property from its parent element. Read about inherit
