

Thread Deadlock

Time 0:

1. Thread1: Gets A.lock. Sleeps for 1 sec to allow Thread2 to get B.lock
2. Thread2: Gets B.lock. Sleeps for 1 sec to allow Thread1 to get A.lock.

Time 1 sec:

3. Thread1: Holds A.lock and tries to get B.class.lock, not B.lock.
4. Thread2: Holds B.lock and tries to get A.class.lock, not A.lock.

Time 2 sec:

5. Thread1: Got B.class.lock.
6. Thread2: Got A.class.lock

There is no Deadlock.
