

e911-example

1. About

e911-example project is a web based project that simulates e911address project. E911address project interacts with Verizon webservice. e911-example does not interact with Verizon webservice. However, e911-example has all the RESTful services similar to e911address. Therefore, users of e911-example can do all the data changes to e911-example without concern of Verizon side effects.

2. SVN URL

https://svn.adpt-tech.net:8443/svn/Tuatara/Appia_B2B/e911-example-v2/trunk

3. Jenkins URL

<http://jenkins.adpt-tech.net/jenkins/view/Appia-B2B/job/e911-example/>
